

# Application to Change Catalog Year

Students may only change from their catalog of entry to a later catalog that is already in print.

Changing catalog year also changes major, minor, concentration and other degree requirements. However, all students are responsible for current university policy as published in the most recent catalog regardless of declared catalog year.

Current, Declared Minors and Concentrations

I understand that by changing my catalog year, I am changing degree requirements for all majors, minors, tracks, concentrations, emphases and any other requirements to earn a degree at Naropa University. I have reviewed the attached degree audit for an indication of what I must complete. However, I am responsible for checking the catalog for the final word on the changes to my degree requirements.
